

## Vacuum Truck

- 3,000+ gallons
- Versatile hauling with a balance of capacity and mobility for drill sites with limited access

## Vacuum Semi

- 5,500 gallons (130 barrel)
- Over-the-road solution for long commutes and high-volume jobs, as well as hydrotest projects
- Self-contained vac units that allow independent operation

Toppert Jetting Service, Inc.

## Air Mover/Material Handler

- 28" blower, 18 yard debris body
- Quick-loading, efficient transfer truck. Very useful as part of package utilizing semis to haul OTR with tight access drill sites.

## Hydrovac

- 18"+ blower, 12 yard debris body
- Versatile unit, carries water for washdown. Very effective for cleanout of frac tanks and mud systems

Toppert Jetting Service, Inc.

## Jetter Truck

- 1,500 gallons, 80gpm pump
- Cost-effective, compact unit for cleanup of drill sites and equipment. Pairs with vac trucks and semis.

## Pumping Solutions

- Slurrygate and transfer pumps available on request
- Logistics solution for crowded drill sites
- Speeds loading on large-volume jobs
